CORKLINE® - a contemporary natural-based material that offers all advantages of natural materials in combination with modern technological innovation. **CORKLINE®** brings a completely new dimension to flooring intended for outside use.

Due to high quality bonding materials combined with cork granules, **CORKLINE®** retains lively and warm appearance of natural materials yet enhanced with exceptional technical characteristics:

DURABILITY WHEN EXPOSED TO ATMOSPHERIC ELEMENTS, RESISTANCE TO GREASE AND OIL SPILLS, ANTI-SLIP PROPERTIES, EXCELLENT RESISTANCE TO DENTS, PRESSURE, SCRATCHING, ABRASION AND STAINS.

CORKLINE® is specially designed for installation on external and internal ship decks, on all marine vehicles and other areas exposed to the weathering (ea. outside terraces, swimming pools, sun decks, etc.). All natural materials are characterized by change in surface color and/or loss of color intensity. In case of **CORKLINE®** such appearance can be avoided (or at least significantly decreased) by coating its surface with teak oil. Such treatment will ensure long-term fresh and natural appearance of the **CORKLINE®** flooring.

CORKLINE® 25 TG BOX CONTAINS:

- | | |
|--|--------|
| ☼ CORKLINE® planks size 1.000 x 50 x 5 mm | 20 pcs |
